

Title: Unraveling the Digital Divide - A Comparative Analysis of Digital Services and Literacy in Bangladesh, Sri Lanka, and Cambodia

Introduction:

Welcome to this case interview where we delve into the depths of digital services and literacy in three fascinating countries - Bangladesh, Sri Lanka, and Cambodia. Our objective is to gather accurate data and visualize it in a compelling graph that will help us understand the state of digital advancement in these nations. As we analyze the numbers, we'll uncover a narrative that either supports or challenges the initial argument. Let's embark on this thrilling journey together!

Question:

The argument states that Bangladesh, Sri Lanka, and Cambodia have lower digital services and literacy. To evaluate this claim, you are tasked with finding relevant data and structuring it into a visually engaging graph (hint: digital services used by population each country, digital skillset). Subsequently, you must provide an insightful narrative supporting or refuting the argument. Please note that your graph needs to be the major part that's telling the story instead of the narrative.
